PRODUCTS

## NOW AVAILABLE IN SINGLE OR DUAL STACK!

Sandia's innovative air intakes use the vacuum's own cooling fans to pull cool outside air over the vacuum motors, reducing motor temperatures by up to 18 percent.

Motors in **Series** are excellent for extracting heavy amounts of water, such as floods, liquid spills, and flood damaged carpet where water has soaked into the fibers and padding. The high amount of water lift pulls heavy liquids.

- 1) Air enters through one stand pipe
- 2) Air flows through one motor to the other to increase pulling power
- 3) Air exits out the back

Motors in **Parallel** are excellent for carpet cleaning, where liquids are suspended in the carpet fibers. High airflow strips the fibers of liquids, speeding drying times and minimizing resoiling.

- 1) Air enters through two separate stand pipes
- 2) Running the motors independently maximizes air flow
- 3) Air exits through two separate exits

**Sandia's SNIPER 1200 Tile, Grout and Carpet Extractor and Turbo Brush Cleaners (5" and 10")**

are an excellent combination when cleaning hard surfaces. Sandia's Sniper 1200 combines exceptional vacuum and 1200 psi injection for the ultimate in contained pressure washing. The Sniper has an "auto-fill" feature that fills the solution tank as well as an "auto-dump" feature that drains the recovery tank for constant working pressure. The system cleans and recovers all liquids used in the cleaning process and ensures that all chemicals are disposed of properly. The versatility of the Sniper 1200 is complete when you adjust the pressure (0 to 1200 psi) to clean carpet and upholstery (additional tools needed)

**1200 Extractor**

- Rotational Molded Plastic**
- One 2-stage**
- One 3-stage Motor**
- 1200 psi Pump,**
- Twin Power Cords**
- 25ft. Solution Hose**
- 25ft. Vacuum Hose**
- In-Line Clear View Filter**
- Auto-Fill Hose 50ft.**
- Auto-Dump Hose 50ft.**
- 130.0" Lift**
- 15/13 \* Amps**
- 131 lbs.**

**Turbo Brush Cleaners**

- 5" and 10" Cleaning Paths**
- Rotational Molded Plastic**
- Stainless Components**
- Molded Brush & Spray Skirt**
- Low-Profile Design**
- 2000psi Hose**
- Truck-Mount Capable**
- Portable Capable**
- Adj. Vacuum Release**
- Superior Design**

**Built from durable Rotational Molded Polyethylene**, these components can withstand even the toughest working environments. The spinning-components are stainless steel with ceramic washers for the maximum in quality and reliability, compare our features and there's only one choice, Sandia.
