SEE THE BENEFITS

of the 6-Quart Raven Backpack Series

Warranty: Lifetime warranty on body, 5-years on motor and all electrical components, 90-days on tools and accessories.

- Fastest soil pick-up with high CFM airflow, making the Raven significantly more proficient than traditional uprights.
- Collects the most soils, leaving exhaust air cleaner with a disposable, heavy-duty paper micro-bag mounted inside a washable cloth shakeout bag.
- Lightweight ergonomic design, with a cushioned back-pad that fits the curve of any operator's back. The comfortable shoulder and waist belt design reduces fatigue, making work easier.
- Twist top lid with static-dissipating vacuum hose and swivel cuff for right- and left-handed vacuuming. The interchangeable lid converts the Raven into a powerful blower.
- Easy-to-reach On/Off power switch, quiet motor and 50-foot long safety power cord.
- 5-piece tool kit included on select models.

APPLICATIONS

- Designed for vacuuming carpet, hard floors and upholstery. Worn on the back to allow for easy and quick vacuuming while walking. Ideal for hallways, airplanes and commercial spaces.

TAPERED VS. CYLINDRICAL

Compare the features – Compare the technology.

With three innovative design advances, the Raven has increased airflow, increased efficiency and has created the quietest vacuum in its class.

1) Increased Airflow:

the Raven's deflector plate holds heavy debris away from the motor filter during use. It prevents the cloth bag from contacting the motor filter and reducing airflow.

2) Excellent Design:

by tapering the vacuum body 3/4" per side, it prevents a bulging bag from contacting the body, allowing airflow around the bag.

3) Most Quiet in its

Category: by adding 70 square inches of sound dampening waffle foam material, the Raven is the most quiet backpack vacuum available!

A) Angled, Static Dissipating Vacuum Hose: keeps the hose out of the way.

B) Vacuum Bag Deflector: keeps particles from tearing the vacuum bag.

C) Bag Support Plate: keeps sagging, heavy bags from impending air flow.
